Description:

Abstract:

This dataset was created to display the management status of the land through the state of Nevada. It has been updated to reflect the most current GCDB lines from Premier data. The ownership for each smallest division was identified by the previous land status layer. In areas of confusion or pieces that were divided in areas smaller than GCDB, the MTP was referenced as the final authoritative source. This project was completed 8/10/10

This dataset was dissolved from the original on the owner

Purpose: This dataset was created to provide continuous land management status for the state of Nevada.
